

# Ejector model 1021

25 N +/- 15% actuation force

## Product description

For electric strikes with normal operation (single types). The door is opened slightly after contact is made. Suitable for normal doors.

## Scope of delivery

- 1 throw-open bolt

## Note

- Ejectors increase preload acting on the door strike by the specified operating force. Bear this in mind when choosing the door strike model..
