

Product description

Processor-controlled bus – Master to operate TS Bus networks with up to 110 devices.

With Ethernet interface to connect to a PC to use visualisation software, configuration software or an OPC server.

With five central inputs, e.g. for emergency release by fire alarm system, priority locking by burglar alarm system, unlocking by timer.

With 3 central relay outputs, e.g. for collective alarm and system failure

With group and interlock functions

Includes FT Manager software to centrally configure networked escape door control units or FT II Generation door monitoring units (as from type series 1385) in web browser.

Includes cross-over cable RJ 45 for direct connection to a PC for configuration

Scope of delivery

- 1 controller
- 1 operating manual

Note

- In plastic housing; H/W/D: 175/240/90 mm

Technical data

Input operating voltage	12 - 30 V DC ($\pm 10\%$)
Version	In plastic housing
Max. power consumption	9,7 W
Dimension	(HxWxD) 175x240x90 mm

Article number	970-TSBC-20--00
EAN-Number	4042203416499
