

Ejector model 1023

70 N +/- 15% actuation force

Product description

For electric strikes with normal operation (first types). The door is opened slightly after contact is made. Suitable for extremely heavy doors.

Scope of delivery

- 1 throw-open bolt

Note

- Ejectors increase preload acting on the door strike by the specified operating force. Bear this in mind when choosing the door strike model..
- Throw-open bolt
