

### Product description

There is a suitable power supply unit for each type of use. The individual power supply units stand out due to their constant output voltage during fluctuations in mains voltage and load alternation.

The mains receiver can be installed in switch cabinets. It has an overcurrent limiter for the output current with automatic restarting.

These stabilised power supply units are used for access control, escape route systems and electric strike systems where a low-noise locking component is required.

### Scope of delivery

- 1 Mains adapter

### Note

- 1 A, (H/W/L) 68/35/93 mm

### Technical data

Input operating voltage	100-240 V AC
Nominal power	24 W
Output voltage	24 V DC
Max. continuous current	24-28 V
Max. continuous current	Up to 1 A
Mounting method	Top-hat rail distributor
Class of protection	IP 00
Material housing	plastic
Sub-units	2
Height	68 mm
Width	35 mm
Length	93 mm
Installation	Top-hat rail distributor
Overload protection	Electronical
Operating temperature range	-5 °C to +40 °C
Protection rating	II/Insulation protection
Color	RAL 7035

Article number	1003-24-1----10
EAN-Number	4042203416574
