

Product description

There is a suitable power supply unit for each type of use. The individual power supply units stand out due to their constant output voltage during fluctuations in mains voltage and load alternation.

The 12 V power supply is suitable for installation in switch cabinets. It has overcurrent limiting of the output current with automatic restarting.

The rated voltage is 12 V DC.

These stabilised power supply units are used for access control, escape route systems and electric strike systems where a low-noise locking component is required.

Scope of delivery

- 1 Mains adapter

Technical data

Input operating voltage	100-240 V AC
Nominal power	15 W
Output voltage	12 V DC
Max. continuous current	-
Max. continuous current	Up to 1,25 A
Class of protection	IP 00
Material housing	plastic
Sub-units	1
Height	68 mm
Width	17,5 mm
Length	93 mm
Mounting method	Top-hat rail distributor
Overload protection	Electronical
Operating temperature range	-10 °C to +50 °C
Protection rating	II/Insulation protection
Color	RAL 7035

Article number	1003-12-1,25-10
EAN-Number	4042203416796
